

ACT_REPORT

WeRateDogs is a Twitter account that rates people's dogs with a humorous comment about the dog. WeRateDogs has over 4 million followers and has received international media coverage.

The analytical insights and Visualization discussed below could only be possible after a careful and invigorating wrangling of data from various sources. However, these insights were drawn from the data frame to explain and show some cogent conclusions.

Conclusions made are shown below;

1. The most liked dog_stage was the 'pupper' stage. Reason for this is unknown, but it appears dogs in this stages had the highest favorite counts, thereby indicating more likeness for it from users.
2. The most liked dog name is Stephan. Stephan sounds really nice and seems to be given to a dog that was in the pupper stage, because obviously pupper was also the most liked dog stage.
3. The most popular dog breed was the golden retriever. Retrievers are great dog with high level of intelligence, hence it is no surprise it came up as the most liked of all dog breeds.

VISUALIZATION

The visualization below shows the different dog stages.

The visualization above confirms an earlier insight that 'doggo' was the most liked dog stage. This might be due to so many reasons, but one major factor could be that dogs in 'doggo' stages were mainly golden retrievers which had the highest number of counts in terms in dog breeds. Following closely behind 'puppo' and 'pupper' dog stages. These actually shows they are the three most liked dog stages by average counts.
